

## Procedure to Install Gemalto Token Driver

1. Installation of the driver has to be done for the first time and only once.

2. Unzip the downloaded file and install the driver by double clicking on **Install** file, as shown in the figure below.

3. In **InstallShield Wizard** you can see the items to be installed in your machine, as shown in the figure below. Click on **Install** button to continue.

4. Click on **Next** button when prompted, as shown in the figure below.

5. Click on **Install** button, as shown in the figure below.

6. On completion of the installation, click on the **Finish** button, as shown in the figure below.

7. An icon by the name **SC-SED** appears on your Desktop, as shown in the figure below.

This will install Gemalto Token Drivers on your machine.
